

The Mathematics Education Collaborative's

# NUMBER TALK INSTITUTE

***Bringing the Standards for Mathematical Practice to Life in Grades 3-12 Classrooms***

Whether teachers have tried *Number Talks* with their students before, or are new to *Number Talks*, this 2-day institute will help them learn how to make *Number Talks* a vibrant and essential part of their everyday classroom practice.

**Participants will:**

- Receive a copy of the book [Making Number Talks Matter](#).
- Experience a learning environment that embodies the Common Core State Standards for Mathematical Practice.
- Learn ways to provide both support for struggling learners and challenges for confident learners without labeling or grouping students.

## Learn Ways To...

...Connect Number Talks to numerical and algebraic reasoning

...Choose what Number Talks to do to help build important concepts and properties over time

...Get buy-in from students even at the high school level

...Help students learn to make mathematically convincing arguments
